

## Product Description:

- Product Name: Triple-Pressed Stearic Acid
- INCI Name: Stearic Acid
- CAS No.: 57-11-4

## Key Features:

- Highly purified
- Hard and stable
- Odorless and tasteless

## Applications:

- Personal care products
- Hair care products like conditioners and styling aids
- Sunscreen and cosmetics
- Candles and waxes
- Furniture polish and cleaning products
- Lubricants and greases

## Guidelines for Use:

Triple-pressed stearic acid is readily soluble in hot oils and can be incorporated into various formulations. Here are some general guidelines:

- Melt the stearic acid in the oil phase of your formula before adding it to the water phase.
- The typical usage rate varies depending on the desired consistency and application. It typically ranges from 1% to 10%.
- Adjust the pH of your formula for optimal performance.
- Triple-pressed stearic acid is compatible with a wide range of other ingredients, but compatibility testing is always recommended.

## Compliance:

Our Triple-Pressed Stearic Acid complies with international safety and quality standards for food and cosmetic grade applications. It is free from impurities, heavy metals, and other harmful substances.
