

Product Description:

- Product Name: Niacinamide - Vitamin B3
- INCI Name: Niacinamide
- CAS No: 98-92-0

Key Features:

- Skin-Enhancing Properties
- Barrier Function Support
- Versatile Application
- Brightening Effect
- Oil Regulation.

Applications:

- Serums and Moisturizers.
- Masks and Treatments
- Sun Care Formulations

Guidelines for Use:

- **Dosage:** Utilize niacinamide at recommended concentrations to achieve optimal results without causing irritation or sensitization.
- **pH Consideration:** Incorporate niacinamide into formulations with a pH range conducive to its stability and efficacy.
- **Combination Potential:** Combine niacinamide with other active ingredients to create synergistic formulations targeting multiple skin concerns.

Compliance:

- Our Niacinamide - Vitamin B3 adheres to stringent quality and safety standards for personal care applications, ensuring its efficacy and safety in cosmetic formulations.
- Stringent quality control measures are implemented throughout the manufacturing process to maintain the purity and potency of niacinamide, meeting the highest industry standards.

***Certifications:** Non-GMO/Kosher
